1/2 The Municipal Council propose that a tax on carts may be substituted in place of the existing octroi, excepting that on cloth, Kerosene oil, sheep and goats. The financial effect of this proposal will, it is said, result in an additional income of Rs 3000/- a year. But though some of the articles on which octroi is now levied may, without appreciable loss of revenue, be abolished, there appear to be some objectionable features in the proposal, and what the financial effect may be if they are removed, cannot be ascertained. It was proposed that through traffic will also be taxed. Government have repeatedly objected to this, and no good reasons have been shown for deviating from this general principle. Again, it is not clear what amounts was realised from the carts going to the weekly market so that the loss from that source may be set off against the estimated yield of Rs 5000/- from the taxation carts. If approved, information on these points will also be obtained before orders issue.
